

Codaiman

Company Profile

An AI-first IT services company — and the studio behind four products used every day by students, businesses and developers.

CWS

siteIQ

ToolHub

Fluenzo

• WHO WE ARE

Two Sides of Codaiman

One engineering team, two ways we ship — client work, and our own product family.

Codaiman is an **IT services company** based in Ahmedabad, India. We design and build websites, mobile apps, AI products, SEO strategy and cloud infrastructure for clients across the US, India and worldwide. Founded in 2023, we've grown from a small team of builders into a full-stack technology partner — while also becoming a **product company** in our own right.

CORE SERVICES

4

OWN PRODUCTS

FOR CLIENTS

Full-Stack Development Agency

Next.js/React web apps, iOS/Android/React Native mobile apps, AI integrations, conversion-focused UI/UX, technical SEO, cloud & DevOps, and custom software for businesses off-the-shelf tools can't serve.

ON OUR OWN

Four Products, One Team

CWS teaches coding, siteIQ audits websites, ToolHub gives away 1,000+ free browser tools, and Fluenzo teaches spoken English with an AI tutor — same engineering standards, four different problems solved.

Our Values

Innovation

Pushing boundaries with cutting-edge AI and emerging technologies.

Integrity

Building trust through transparency, security, and ethical practices.

Excellence

Delivering solutions that exceed expectations and drive real results.

Collaboration

Working closely with clients to turn their vision into reality.

WHAT WE DO

Services For Clients

A full-stack technology partner — from a landing page to a production AI platform.

Web Development

01

Custom web apps built with Next.js, React and AI-first features — fast, scalable websites for clients across the US, India and worldwide.

Mobile App Development

02

Cross-platform and native mobile apps that ship fast and scale — iOS, Android and React Native, for startups and enterprises.

AI Website Builder

03

AI-assisted builds with a human-led design layer — LLM-generated scaffolds paired with hand-crafted UX, shipped in days not weeks.

UI/UX Design

04

Product-led UI/UX design that converts — interfaces that feel premium, ship clean, and turn visitors into paying users.

SEO & Digital Marketing

05

Technical SEO, on-page optimisation and digital marketing campaigns that grow ranking, traffic and revenue worldwide.

Cloud & DevOps

06

Production-ready cloud setup, CI/CD pipelines, observability and cost optimisation across AWS, GCP, Vercel and self-hosted VPS.

Technology Consultancy

07

Strategic guidance on architecture, AI integration and product roadmaps — the right tech bets early, avoiding expensive rewrites.

Custom Software Solutions

08

End-to-end custom software for unique business needs — internal tools, dashboards, automations and integrations.

How We Work

01

Discovery

We deep-dive into your goals, audience and technical requirements.

02

Strategy

A tailored roadmap with clear milestones and deliverables.

03

Build

Our engineers craft the solution with precision and modern practice.

04

Launch & Grow

We deploy, monitor and iterate — your success is ongoing.

● OUR PRODUCT FAMILY

Built & Run By Codaiman

Beyond client work, we build and run our own products — each its own brand, all engineered by the same team.

CWS — Code With Squad

codaiman.com/cws

Learn to code with a squad

A hands-on coding teaching platform. Free preview lessons, an in-browser code playground, then personal guidance from real mentors.

Courses

Code Playground

Mentorship

siteIQ — Website Intelligence

codaiman.com/siteiq

Audit any website in seconds

An AI-powered website audit tool — security, performance, SEO, backlinks, accessibility and infrastructure, all in one report.
